Attention RID Customers,

The amount of rain and snowy weather Arizona experienced this winter continues to provide spill water. This spill water is still projected to flow into May. With spill water continuing, the Roosevelt Irrigation District Board of Directors has decided to ignore allocation limits for the remainder of the 2023 calendar year.

Without water usage limits, please be aware that we may enter into prorate. The District enters prorate when the demand for water exceeds our available supply. "Prorate" rations the supply across the district. Historically, the District would go into a prorate condition for most of the summer. The last few years this condition was not required. Although we are not in prorate now, you will be notified if this condition becomes necessary.

Removal of the allocation is effective April 11th, 2023. If you have any further questions, do not hesitate to contact us here in the office.

Thank you,

Donovan L. Neese

Superintendent

Find out how you can save on your water use!
ABWC is hosting the University of Arizona to inform you about the

Water Irrigation Efficiency Program

Designed to increase irrigation water application efficiency in crop production by 20% or more. Approved grantees will receive up to \$1,500 per acre, for a maximum reimbursement of \$1,000,000 toward the purchase and installation of a system from an approved vendor.
